Message from Vice Chancellor

Dr. RAKESH SINGHAI

"Every year, I meet students who arrive here uncertain of what they want to become, and leave with a clearer sense of who they are and what they stand for. That transformation—not the campus, not the rankings, nor the infrastructure—is the true measure of a university.

The world our students are entering no longer rewards knowledge alone. It values those who can think independently, adapt with confidence, and act with integrity when the answers are uncertain. Our responsibility, therefore, extends beyond teaching. It is to cultivate the judgment, resilience, and character that will guide our students long after they leave our classrooms.

I see the outcome of that responsibility in our graduates—in those who build enterprises, advance research, lead organizations, and contribute meaningfully to society. Their diverse journeys reflect not only individual achievement but also an education that prepares them to thrive across disciplines, professions, and communities.

Progress is meaningful only when it is guided by purpose.
To our students, faculty, alumni, parents, and partners, thank you for the trust, commitment, and shared belief that make this university what it is. The most meaningful chapters of our journey are still ahead, and I look forward to building them together.
With best wishes,"

Message from Head of the Department

Dr. GOVIND MAHESHWARI

"The value of data has never been in the numbers themselves—it has always been in the decisions they enable. Our responsibility, therefore, is not simply to teach students how to analyze data, but how to question it, interpret it, and use it wisely.

That philosophy defines the School of Data Science and Forecasting. Every programme has a distinct purpose, yet they all share a common foundation: intellectual curiosity, analytical rigor, ethical responsibility, and the confidence to solve real-world problems. Whether our students pursue artificial intelligence, data science, forecasting, or analytics, they are encouraged to think beyond algorithms and understand the impact of the decisions they make.

One of the greatest strengths of our department is the culture of learning we have built together. Students challenge one another, faculty mentor beyond the classroom, and ideas are strengthened through collaboration across disciplines. That exchange of perspectives is what transforms technical knowledge into meaningful understanding.

As educators, our greatest satisfaction comes not from the degrees our students earn, but from the confidence, character, and competence they carry into the world. We remain committed to nurturing professionals who are prepared not only for the careers of today, but for the challenges of tomorrow."

VISION

"To be a premier global hub for data-driven innovation, research, and education, leading the way in developing ethical and impactful predictive solutions"

ABOUT SDSF

HISTORY

Founded in 1991, the School of Data Science and Forecasting is a pioneering institute in Data Science and Analytics education in India. It offers specialized programs in Data Science, Business Analytics, and AI and DS with Big Data, with a strong focus on applied statistics, artificial intelligence, predictive modelling, data mining, and forecasting methods. With an emphasis on industry projects, research, and consultancy, SDSF is equipped with expert faculty, advanced labs, and modern resources that prepare students to become data-driven professionals and business leaders.

MISSION

- Empower learners with analytical excellence.
- Foster interdisciplinary research and innovation.
- Cultivate a community that uses data science
- Use forecasting to solve complex real-world problems.

SDSF Constituent School of Devi Ahilya Vishwavidyalaya (DAVV) Takshila Campus, Indore, Madhya Pradesh.

SINCE 1991

SDSF at a Glance

NAAC recognition reflects its modern curriculum in big data, analytics, and forecasting tech.

ACCREDITED WITH GRADE A+ NAAC

ACADEMIC PROGRAMME

MBA
(Business Analytics)

A two-year postgraduate program that integrates business management with data analytics. It equips students with skills in business intelligence, predictive analytics, data visualization, and strategic decision-making using analytical tools.

M.TECH
(BDA/DS)

This program specializes in big data technologies, distributed computing, data processing frameworks, and large-scale analytics, enabling students to solve complex data-driven challenges.

M.TECH
(AI/DS Dual Degree)

A five-year integrated program that combines undergraduate and postgraduate studies, providing comprehensive training in AI, machine learning, data science, programming, and intelligent systems.

MSC
(Data Science and Analytics)

A two-year postgraduate program focused on statistics, programming, machine learning, artificial intelligence, big data, and data visualization. The curriculum emphasizes practical learning through projects, internships, and research.

Academic Infrastructure

Our campus is self-sufficient and fully equipped with all the essential facilities required for a modern educational institution. It features digital classrooms of various capacities, well-equipped laboratories, a central digital library, a fully air-conditioned conference hall, a dispensary, and a spacious seminar hall, ensuring a comfortable and enriching learning environment.

ACADEMIC BLOCK

LIBRARY

Our modern college library is equipped with an extensive collection of books as well as advanced computer systems with high-speed internet connectivity. It provides students with access to both traditional and digital learning resources, helping them enhance their knowledge effectively. At present, the library houses a wide range of technical books, making it a valuable resource for academic excellence.

Academic Infrastructure

The seminar hall is a modern and well-equipped facility designed to host academic sessions, workshops, guest lectures, conferences, and other events. With a seating capacity of more than 50 students , it provides a comfortable and professional environment for effective learning and knowledge sharing.

SEMINAR HALL

COMPUTER LABS

The college has well-equipped computer laboratories across all departments to support programming and practical learning based on their respective disciplines.

Each lab can accommodate more than 40 students where we provide experienced faculty for different types of programming languages like Python, C++, Java, and training Machine Learning models.

FESTS AND EVENTS

Devi Ahilya Vishwavidyalaya (DAVV) Indore offers a vibrant campus life, blending academics with a rich cultural and sports environment. The university is known for hosting grand events like Sfoorti, Pankhudi, Hackhive, E-Summit, and inter-college sports competitions, fostering a spirit of enthusiasm and healthy competition among students.

Youth Festival is one of the most awaited celebrations, bringing together talented students from various colleges to showcase their skills in music, dance, drama, and literature.

With a balance of academics, cultural vibrancy, and sports enthusiasm, DAVV Indore offers students an enriching experience that nurtures talent, fosters camaraderie, and prepares them for holistic growth.

FESTS AND EVENTS

GDGOC SDSF

Google Developer Groups (GDG) On Campus – SDSF DAVV
Actively contributed to the Google Developer Groups (GDG) On Campus – SDSF DAVV, a student-led technical community dedicated to fostering innovation, learning, and collaboration through Google technologies.

HACKHIVE

The HackHive 2024 was a prestigious 36-hour PAN-India hackathon hosted by DAVV Indore's SDSF. The event drew over 300 participants from more than 2,000 national registrations. Teams were challenged to build real-world solutions for 15 problem statements across high-demand domains, including AI/ML, Blockchain, IoT, and Cloud/DevOps.

PANKHUDI

Pankhudi is the annual student fest of the School of Data Science and Forecasting, DAVV, bringing together culture, sports, creativity, and student participation. Through competitions, performances, and team-based activities, the fest provides a vibrant platform for students to express talent, build teamwork, and celebrate campus life.

PLACEMENT PROCEDURE

The placement season begins in July and lasts until June of the following year.

The Placement Cell sends out invitations to organisations in March along with the placement timeline and other pertinent information.

The company's visit is tentatively scheduled based on the package offered by the company. The cell schedules a Pre-Placement Talk after receiving confirmation.

A list of interested candidates who meet the company's criteria is prepared after a company posts an announcement and submits the JNF.

The company has its own selection procedure and shortlists students for interviews. Typically, the results are announced on the same day.

Students who receive confirmation letters are reserved for the specific company and are not permitted to participate in any further recruitment drives.

Placement Progress Map

Message from Faculty

Dr. Vandit Hedau

Associate Professor

"My mission is to develop industry-ready professionals by integrating strategic management principles with practical exposure in Supply Chain and Project Management."

Dr. Shishir Kumar Shandilya

Associate Professor

"Empowering students with expertise in data privacy and cyber-security, I encourage innovation, ethical decision-making, and continuous learning to prepare future leaders for the evolving digital world."

Dr. Anupam Jain

Professor

"I am committed to cultivating analytical excellence and problem-solving abilities through the timeless wisdom of mathematics and the practical applications of Operations Research."
